

A complete listing of all the ministries at St. Thomas More (STM) can be found at our website:
<http://www.stmparadise.org/ministries>

The IT Ministry maintains all digital and communication technologies for STM. Items supported and maintained: Servers, Computers, Wireless communications systems and access points, Digital switches, Routers, Network infrastructures, Website design and maintenance, Email account management, Application and database support, Solar energy tracking, Data flow management including private and public cloud computing, Backup management and support for additional wireless devices like smart phones, security infrastructure, video surveillance, etc.

The IT Ministry provide consultation and guidance to STM, vendor management and evaluations, contract negotiations and the evaluation of new technology and equipment as all keeps evolving. Training modules are designed, produced and deployed via the web or in-house training classes held for our volunteers using our computers and applications. This ministry has also provided computer training in the community and requires an in-depth knowledge of networks, servers, computer, website design, digital communications and communication skills.

For more information please contact Lou Gervais at (530) 872-0278, or drop me a line at: LouG@stmparadise.org Your STM IT Director.
